SMS Backup & Restore - solving the problem of working with SMS messages for Android smartphones. The program is specifically designed to backup SMS in the case of accidental deletion, you get 100% recovery. For convenience, when creating a backup, you can assign the file name, as well as other things that much easier for you to work with messages. by Rexdl · June 24, 2022Current Version: 10.17.002File size: 13 MBMemorize: www.Rexdl.com Free direct download last version SMS Backup & Restore Pro from Rexdl. A simple App to Backup and Restore SMS Messages. This is a Paid No-Ads version of the Ad-Supported Free App.NOTE:We are excited to announce a new version of our main app, SMS Backup & Restore (the free version), which combines the functionality of backing up and restoring both text messages and call logs! In mid-February, we will discontinue support for this PRO version app, and focus on the more feature rich SMS Backup & Restore FREE app which we will be updating regularly.The new version will work seamlessly with any existing backups you have. Additionally, you can transfer your backup settings to the new app with a single tap!If you need an SMS backup app right now, we encourage you to download the free version. Thank you, and we look forward to providing some exciting new features soon!APP FEATURES: Backup SMS (text) Messages in XML format. Local device backup with options to automatically upload to Email, Google Drive or DropBox using the add-on app. Choose a recurring scheduled time to automatically backup. Option to backup MMS (media in the messages) Option to select which text conversations to backup or restore. View and drill into your backups Search your backups Restore/transfer backup to another phone. Backup format is independent of the Android version so the messages and logs can be easily transferred from one phone to another, irrespective of the version. Ability to restore pre-existing SMS or call logs backups from our other apps. Ability to restore all text messages or only selected conversations. Free up space on your phone. Delete all SMS Messages or call logs on the Phone. Email a backup file. The XML backup can be converted to other formats, and can also be viewed on a computer.Notes: Tested on Android 4.0.3 and higher Please start the app at least once after updates so that the scheduled backups start working. Backup is created locally on the phone by default, but you have the option to upload to Email, Google Drive or Dropbox. You are responsible for backup files. At no time are the files sent to the developer. On newer phones with inbuilt storage the default backup location will probably be the internal storage card and not the external. This is because the phone reports the storage that way. If you intend to do a factory reset on the phone, please make sure you save/email a copy of the backup outside the phone before doing it. On Android 4.4+ devices, if you have performed the Restore and the messages don't appear in your messaging app then: Open your messaging app and Disable SMS from Settings. Exit the app Open the app again and Enable SMS from Settings.For questions or issues please visit our FAQ at: App needs access to the following: \* Your messages: Backup and Restore messages. Receive SMS permission needed to properly handle messages received while the app is the default messaging app on Android 4.4+ devices. \* Storage: To create the Backup file on the SD card. \* Phone calls - Without this the Restore fails on some phones. \* Your social information: To display and store the contact names in the Backup file. \* Run at start-up: Start scheduled Backups. \* Control Vibration: To vibrate the phone when an operation is completed. \* Prevent Phone from Sleeping: To prevent the phone from going to sleep/suspended state while a Backup or Restore operation is in progress. \* Test access to Protected Storage: To create the Backup file on the SD card.- Option to accept self-signed certificate for WebDAV.- Better progress displayed during deletion of all calls/messages - More details displayed after restore completion - Fix SMTP server for Outlook/Hotmail - Fix for inadvertently logging user out of OneDrive Download Accelerated up to 200% with dFast Torrent Cloud™ Enjoy the fastest download service with dFast. QR Code Author Latest Version: 2.73 Publish Date: Sep 25 2022 Download APK (5.36 MB) SMS Backup is a very simple app that makes a backup of your SMS and MMS messages (images and audio files), lets you share them and then restore/transfer to another phone (currently only SMS).Important notice:- This app doesn't restore deleted messages.- If you're missing some messages or one side of conversation in your backup, it's probably because this app doesn't back up RCS messages (also known as Advanced Messaging) unless you use Google Messages as your default texting app. Turning Advanced Messaging off will allow the app to back up new messages only, not those already stored as RCS.The app can export your conversations to two different formats:1) nice-looking read-only HTML format with chat bubbles,2) restorable JSON data file in case you plan to transfer your messages to another phone,and saves them to your internal device storage.You can easily send these files to your e-mail, Gmail, Google Drive or wherever you want. If you are switching to a new phone and you want to transfer your SMS messages, this app is exactly what you're looking for. It not only creates a data file which is required to restore messages, but also saves your text messages to HTML format. Therefore you can open and view your backed up messages almost anywhere, whether it is your computer or iPhone!If you have any questions or any improvement ideas, please send an email to us at [email protected] Thanks! Category: Free Tools Get it on: Requirements: 5.0 or higher+ SMS Backup & Restore! APK Version History SMS Backup & Restore! 2.73 for Android 5.0 or higher APK Download Version : 2.73 for Android 5.0 or higher Update on : 2022-09-25 Download APK (5.36 MB) SMS Backup & Restore! 2.69 for Android 5.0 or higher APK Download Version : 2.69 for Android 5.0 or higher Update on : 2021-12-11 Download APK (4.97 MB) SMS Backup & Restore! 2.25 for Android 5.0 or higher APK Download Version : 2.25 for Android 5.0 or higher Update on : 2020-06-23 Download APK (5.75 MB) Download SMS Backup & Restore APK latest version Free for Android ↓ Download APK (394.06 KB) Gizmoquip SMS Backup is an easy to use very flexible app to backup and restore your SMS Text messages and MMS (Multimedia Messages). You can backup and restore your SMS text messages to SD Card or forward the backups via email, MMS, DropBox or Skype. You can restore your backups from SD Card, or by clicking on an email attachment. • Migrate SMS Text and MMS messages - Easily move your text messages from your old phone to a new phone. • Backups are saved in XML format. • Send your backups anywhere using email, MMS, DropBox, Skype, or any other app that can send attachments. • Schedule Automatic backups • Restore directly from email, by clicking on the backup attachment. • Highly configurable. Settings allows you to specify where to save the backups. Default is to the SD Card.Works great for migrating your messages from an old phone to a new phone.Gizmoquip SMS Backup is fully compatible with other Gizmoquip apps including SMS Scheduler, SMS Tracker and Call Blocker ↓ Read more APK20Apps>Tools>SMS Backup & RestoreSMS Backup & Restore is an app that backs up (creates a copy of) SMS & MMS messages and call logs currently available on the phone. It can also restore messages and call logs from already existing backups.Note: This app requires existing backups to be able to restore call logs and messages. It cannot recover anything without existing backups.For questions or issues please visit our FAQ at: ...See morePlease be aware that APK20 only share the original and free apk version for SMS Backup & Restore 10.18.001 without any modifications.All the apps & games here are downloaded directly from play store and for home or personal use only. If Apex Launcher apk download infringes your copyright, please contact us, We'll delete it in a short time>Contact UsTerms Of UsePrivacy PolicyDCMA Table of ContentsSMS Backup & Restore Pro Mod Apk: The SMS Backup and Restore Pro app backs up and creates a backup of SMS and MMS messages as well as call logs that are currently accessible on your phone. You can restore call logs and messages from backups.SMS Backup & Restore Pro App FeaturesOther features that are not included in the app are free of charge:Backups can be compressed and encrypted.Use WebDAV to backup your data.- Backup SMS text messages (text) and call logs MMS in XML format- Backup of local devices with the option to upload automatically to Google Drive DropBox or OneDrive.Backup files can be compressed and encrypted.Select a time that you want to backup automatically.You can choose which conversations you want to restore or backup.You can view and drill into the cloud and local backups.Backups are availableBackup can be restored or transferred to another device. The backup format can be used independently of the Android version. This allows messages and logs to easily transfer from one device to the next, regardless of which version.Fast transfer between two phones via WiFi directYou can free up storage space by doing this. All SMS and call logs from the phone should be deleted.- Email a backup file.- The XML backup can be viewed on a computer via the online viewer at 5.0 or higherBackups created by the app are not restored by AppBackups are created on the phone automatically, but you can upload them to Google Drive DropBox OneDrive, and Email. The files are never sent to developers.Before performing a factory reset, please ensure that there is an image of your backup.Access to this app is required for the following\*Your messages: Restore and backup messages. You will need to grant SMS permission in order to correctly handle messages that have been received when the app is your default messaging app.\* Contact Information and Calls: Backup and Recovery Call Logs\* Allows you to view the network and communicate with other devices.\* Social Information: Display and save contact names from the Backup file.\* Start at startup: Create scheduled backups.\* Stop Phone From Sleeping: This prevents the phone from falling asleep/suspending while an operation to Backup or Restore is underway.\*Account Information: For cloud uploads, authenticate with Google Drive or Gmail.\* Location: This location is only requested for WiFi direct transfers.
